RANJITH M

Python Developer | Full-Stack Developer | Generative AI | Web Development

Phone: 8072231962 | Email: ranjithmuthu2407@gmail.com | Villupuram, Tamil Nadu

Portfolio | GitHub | LinkedIn

PROFESSIONAL SUMMARY

B.Sc. Computer Science student and full-stack developer with hands-on experience building web applications using Python, PHP, React, PostgreSQL, and MySQL. Contribute to an open-source Tamil OCR pipeline, developing Python data-preprocessing scripts. Experienced with AI-assisted development workflows, application prototyping, and code optimization.

PROFESSIONAL EXPERIENCE

Open Source Developer | VGLUG Foundation (Open Tamil OCR) **Aug 2026 – Present**

- Contribute to an open-source OCR pipeline that extracts text from scanned Tamil documents.
- Develop modular Python scripts to preprocess, clean, and structure document images before AI recognition.
- Collaborate with open-source contributors using Git/GitHub version control and code reviews.

Python Programming Intern | Dathon **Oct 2026**

- Earned 9.1/10 (Grade A+ Distinction) in technical evaluations covering software architecture and functional correctness.
- Built and refactored modular Python codebases while following standard-library constraints and PEP 8 conventions.

Java Programming Virtual Intern | Cod Soft **Aug 2026 – Sep 2026**

- Completed a four-week virtual internship, delivering programming tasks and implementing core logic using Java.

EDUCATION

Bachelor of Science (B.Sc.) in Computer Science | Arignar Anna Government Arts College, Villupuram **Pursuing**

Higher Secondary Certificate (12th Grade) | Government Higher Secondary School, Panamalaippettai, Villupuram | 68.17% **2024**

Secondary School Leaving Certificate (10th Grade) | Government High School, Siruvalai, Villupuram | 51.2% **2022**

TECHNICAL SKILLS

Programming: Python, JavaScript, HTML5, CSS3, PHP, SQL, Java

Frontend: React, Tailwind CSS, Vite, Responsive UI Design

Backend & Databases: Node.js, FastAPI, Flask, PostgreSQL, MySQL, Supabase

Cloud, AI & Tools: Generative AI, Prompt Engineering, Git, GitHub, Render, Cloudflare, Linux

PROJECTS

Student Record Maintenance System | HTML5, CSS3, JavaScript, PHP, Supabase (PostgreSQL), Render

- Built a student data management application with user authentication and dynamic record querying.
- Integrated Supabase for relational PostgreSQL storage and deployed the application on Render. Live Demo

Library Management System | Python, HTML, CSS, JavaScript, SQL

- Developed a web-based system to track library inventory, borrowing metrics, and real-time book availability.
- Created a responsive interface connected to a relational SQL database for data retrieval.

CERTIFICATIONS & MILESTONES

Salesforce Admin with AI Agentforce – NASSCOM | Google Cloud Gen AI Foundations – SmartBridge (Gold, 70%+)

Prompt Engineering and ChatGPT – NASSCOM | Python with Generative AI – VGLUG Foundation

Python Programming – Kaggle | Web & Front-End Development – Naan Mudhalvan
